

# Agenda 3

## 1. Overview of progress since last meeting

In particular:

- a. New UI for project editing (medium style editing)
- b. New UI for creating new blocks
- c. New Homepage

## 2. Design

- a. How do we handle templates in the new UI?
- b. How do we handle resizing images so they look nice on the page?
  - i. Should we require a minimum resolution?
- c. Do we allow users to move blocks to different positions on the page?
- d. How much freedom do we give users in customizing the block? Total design freedom (i.e. like medium placing the image anywhere?) or do we stick with the templates
- e. Rethinking the project page, how can we make it more visually appealing while still making it professional?

## 3. Features

- a. Further integration with Github
  - i. Automatic gist creation
  - ii. Gists aren't formatting code well right now, try another library?
  - iii. Automatic project creation from Github projects?
- b. Videos: Use S3/HTML5 or let Youtube host videos?
